Stephen Niec
563 Center Street, Suite 201
Ludlow, MA 01056

Dear Stephen Niec,

Congratulations! The AIHA Registry Programs® has approved your registration on the Asbestos Analysts Registry (AAR) per AAR Policy, Article IV, Section 4.2.13. Status as an AAR Registered Analyst takes effect **October 23, 2013**. Your name has been included on the AIHA Registry Programs® website as an Asbestos Analysts Registry (AAR) Registered Analyst.

<http://www.aiharegistry.org/AARAnalysts>

Your Registered Analyst status will remain current as long as you maintain two or fewer outliers in the two most current, consecutive Asbestos Analysts Testing (AAT) rounds. You will automatically lose your Registered Analyst status if you cease analyzing AAT samples with an approved organization, or you transfer to an unapproved organization.

If you should receive more than two outliers in two consecutive rounds, your AAT Performance Results report will show that you are "not acceptable" or if you lose your Registered Analyst status, to reinstate your Registered Analyst status, your options are to:

- 1) Purchase the current round's retest and successfully override the results; or
- 2) Analyze the next regularly scheduled AAT round(s) until your total outliers in two (2) consecutive AAT rounds is no more than 2 outliers.

If you foresee non-participation in a future AAT round, in order to retain Registered Analyst status, the AIHA Registry Programs® requires a written request for an excused absence from that round, before the date that the results are due for that particular round. Please note that excused absences will not be granted for two consecutive AAT rounds per AAR Policy, Article III, Section 3.9.2.

Congratulations again and thank you for your continued participation in the Asbestos Analysts Registry program. If you have any questions please do not hesitate to contact me at (703) 846-0798 or cdezio@aiha.org.

Sincerely,

Carter Dezio
Program Specialist, AIHA Registry Programs®
